[linkedin.com/in/hasaan-hameed](https://www.linkedin.com/in/hasaan-hameed) | github.com/hasaanhameed | hasaanhameed.vercel.app

Final year CS student at NUST passionate about building AI-powered web and mobile applications, with hands-on experience integrating LLMs, RAG pipelines, and intelligent automation into production-ready products.

EDUCATION

Bachelor of Science in Computer Science — SEecs, National University of Science and Technology

CGPA: 3.60 / 4.00 | 2023 – 2027

EXPERIENCE

Junior Software Developer | CARE Pvt. Ltd.

Jan 2026 – May 2026

- Sole developer of the Norasol Admin Portal — a full-stack internal control panel for managing solar inverters, batteries, customers, and staff; built with React, FastAPI, Supabase & Docker, deployed to production and actively used by the CARE team.
- Implemented dual-layer RBAC with 9 staff roles enforced at both the FastAPI API layer and Supabase Row-Level Security policies, ensuring data access is locked down at the source.
- Built a real-time device notification system using MQTT pub/sub architecture, applying threshold-based filtering to alert customers of abnormal inverter/battery readings.
- Set up a full CI/CD pipeline using GitHub Actions, Docker multi-stage builds, GHCR, and Caddy reverse proxy for automated production deployments.

Full Stack Development Intern | CARE Pvt. Ltd.

Jul 2025 – Aug 2025

- Built a shooting range automation system using the Reflex framework, replacing manual paper-based workflows with a digital session management platform.
- Implemented shot plotting on bullseye diagrams, per-session marksmanship analytics (centroid, group size, performance trends), and QR code-based session login.

SKILLS

Languages: Python, SQL

AI & LLM: LangChain, LangGraph, Groq, RAG Pipelines, Sentence Transformers, Hugging Face, Vector Databases

ML & Data: PyTorch, Pandas, NumPy

Backend: FastAPI, SQLAlchemy, Alembic, REST APIs, MQTT, JWT Authentication, RBAC, Celery

Frontend & Mobile: React, TypeScript, Flutter

Databases & Caching: PostgreSQL, Redis

DevOps: Docker, GitHub Actions, CI/CD, Nginx, n8n

Tools & Platforms: Supabase, Vercel, Railway, Upstash, N8N

Version Control: Git, GitHub

PROJECTS

RepoMind | [GitHub](#) | [Demo](#)

Built a web app to let developers instantly understand any GitHub repository by chatting with its codebase using RAG & LLaMA-3.

FastAPI, React, LangChain, LangGraph, pgvector, Redis, Docker

DermaLens | [GitHub](#) | [Demo](#)

Built a healthcare app to detect skin diseases from images using a custom-trained PyTorch CNN, with RAG-powered dermatology chat and PDF report generation.

Flutter, FastAPI, PyTorch, LangChain, Groq, Supabase, Redis, Docker

NustPulse | [GitHub](#) | [Demo](#) | [Live](#)

Built an automated academic platform for NUST students to sync deadlines from the university LMS and receive Gmail notifications before due dates.

React, FastAPI, Celery, PostgreSQL, Redis, Docker

NustMarkaz | [GitHub](#) | [Demo](#) | [Live](#)

Built an all-in-one campus platform for NUST students covering marketplace, carpooling, lost & found, events, societies, cafes, trips and donations.

React, TypeScript, FastAPI, PostgreSQL, TailwindCSS, Docker

HireReady | [GitHub](#) | [Demo](#)

Built an AI-powered recruitment platform where job seekers get resume analysis, skill gap insights & learning roadmaps, while recruiters get automated applicant screening.

React, FastAPI, Groq, LangChain, Supabase, Docker
